ABOUT THIS DOCUMENT

This document was prepared to demonstrate a possible ChatQuire PDF format. It was not generated by a released ChatQuire app. ChatQuire is in development.

All names, dates, messages, and source references are invented for this example. Source labels identify entries in this synthetic conversation, not imported files. Times are fictional local times; no time zone is specified.

A readable record helps someone follow a conversation. It does not establish sender identity, completeness, or whether a court will accept the record.

Alex Morgan

9:23 AM

Both are included. The contact page now uses the new email address, and the homepage images have been resized.
